

MUHAMMAD SIDDIQUE

web developer

About Me

I'm a passionate computer science student who loves to improve and always hits deadlines. I work great in teams, using my good communication skills to help us succeed. I'm excited about exploring new tech and coming up with fresh ideas with other students who share my interests. Together, let's make our mark in the ever-changing world of technology.

(UI) Design

EXPERIENCE

Web Development Projects

Online Customer Food Management System (FYP)

An Online Customer Food Management System, using a tech stack that includes HTML, CSS, and JavaScript for the Front-End, and PHP with MySQL for the Back-End. This project reflects my passion for web development and problem-solving, as it allows users to efficiently manage their food orders and deliveries online.

School Management System | C# Sharp

Embarking on a journey of innovation, I spearheaded the development of SchoolMate, a cutting-edge School Management System crafted with C# programming and integrated with a MySQL database. SchoolMate stands as a testament to my dedication to creating impactful and user-centric solutions in the realm of education technology.
